Date: 05/06/2026

Dear Hiring Manager,

I am writing to apply for the Full-Stack Developer Internship position at Saat R&D Center. I am a fourth-year Information and Communication Engineering student at the Institute of Technology of Cambodia, and I am eager to gain practical experience in full-stack web development.

I am available for a three-month internship starting July 1st to August 31st, 2026. Through my academic training, I have built a solid foundation in HTML, CSS, JavaScript, Vue.js, Next.js, Java(OOP), Spring Boot, NestJS, Laravel, and MySQL. I have also gained practical experience developing web projects, including a student Enrollment Management System, an online Perfume E-Commerce website, and the Jomnus micro-task platform, which strengthened my understanding of full-stack development, database integration, and responsive design.

In addition, my work experience as a restaurant service staff and editor has helped me develop strong teamwork, communication, and time management skills. I am confident that my technical skills, discipline, and enthusiasm will allow me to contribute effectively to your development team and support the creation of innovative web applications.

Thank you very much for considering my application. I would welcome the opportunity to further discuss how I can contribute to your projects while continuing to grow under the guidance of your experienced team.

Sincerely,

DIN RASY
